HALOKAZI

Requirements Gathering and Analysis

Consolidated Requirements Document

Item	Details
Project	Halokazi — Web-Based CV Builder, Career & Job Opportunity Platform
Purpose	Requirements baseline for management and team review
Date	12 September 2026
Development	In-house — Halotel Software Department

1. Purpose

This document consolidates the requirements identified during the Requirements Gathering and Analysis stage. It defines the agreed business functions, rules, roles, security requirements and key non-functional requirements that will guide the next stages of the project.

The document is intended for review and approval by the project team and relevant stakeholders. After approval, it will form the basis for the detailed SRS, use cases, system design, database design and implementation planning.

2. Project Scope

2.1 In Scope

- User registration, login and account management
- Job Seeker professional profiles
- CV creation, editing, preview and PDF download
- Employer registration and verification
- Vacancy creation, publication and management
- Job search, filtering, sorting and saved vacancies
- Job applications and application status tracking

- In-system notifications and SMS OTP verification
- Administration, user reporting and moderation
- Reports and analytics
- Audit logging
- Security, privacy and data protection
- English and Swahili support

2.2 Out of Scope for Initial Release

- Native Android or iOS applications
- AI-based CV generation, scoring or candidate screening
- Video interviews
- Psychometric or advanced technical assessments
- Advanced AI candidate-job matching
- External recruitment-platform integrations
- Subscription or monetization features

3. User Roles and Access

Role	Main Responsibilities
Job Seeker	Manage profile and CVs, search vacancies, apply for jobs, track applications and receive notifications.
Employer	Complete verification, manage company information, create and publish vacancies, review applications and update application status.
Admin	Perform administrative functions only where the required permission has been assigned.
Super Admin	Full system administration, including creation and management of Admin accounts and permissions.

Admin permissions shall be assigned individually by the Super Admin. An Admin shall only access functions permitted by the assigned permissions. An Admin cannot change their own permissions.

4. Authentication and Account Management

AUTH-01 Job Seeker registration shall require full name, email, phone number, password and password confirmation.

AUTH-02 Job Seeker phone verification shall be completed using an SMS OTP during registration.

AUTH-03 OTP shall be valid for 2 minutes and limited to 3 resend attempts within the defined control period.

AUTH-04 Users shall be able to log in using either email or phone number and password.

AUTH-05 Users shall be able to reset a forgotten password and change their password after authentication.

AUTH-06 Password shall contain at least 8 characters, including uppercase, lowercase, number and special character.

AUTH-07 Employer accounts may be created before verification and shall start in Pending Review.

AUTH-08 Pending or rejected Employers shall not access Employer functionality.

AUTH-09 A rejected Employer may correct information and resubmit for verification.

AUTH-10 Authorized administrators shall be able to suspend accounts.

AUTH-11 Users may request account deletion. Deletion shall use soft deletion and appropriate anonymization, subject to required record retention.

AUTH-12 User sessions shall expire after 10 minutes of inactivity.

AUTH-13 The system shall apply rate limits to security-sensitive actions such as login attempts, OTP requests/resends and password-reset requests.

5. Job Seeker Profile

The Job Seeker profile shall contain the following sections:

Profile Section	Weight
Contact Information	10%
Education	15%
Work Experience	15%
Skills	15%
Certifications	10%
Languages	10%
Address/Location	10%
Professional Summary	10%
Profile Picture	5%
Total	100%

The system shall calculate profile completion automatically using the weights above. A Job Seeker shall be eligible to apply when the completion score is at least 75%.

For sections that genuinely do not apply to a Job Seeker, the system shall provide an appropriate 'Not Applicable' option where agreed during UI design, so the completion calculation does not unfairly penalize users for information they do not have.

PROF-01 Job Seekers shall be able to create, view and update their profiles.

PROF-02 The completion percentage shall be visible to the Job Seeker.

PROF-03 Profile information shall be captured as part of the application snapshot at submission.

PROF-04 Changes made to a profile after application submission shall not change the information already submitted with that application.

6. CV Management

CV-01 A Job Seeker shall be able to maintain multiple CVs.

CV-02 The initial release shall provide 5 predefined CV templates.

CV-03 CVs shall support profile information, references, achievements, projects and hobbies/interests.

CV-04 Job Seekers shall be able to create, edit, preview and delete CVs.

CV-05 CVs shall be downloadable in PDF format.

CV-06 External CV upload shall not be supported in the initial release.

CV-07 Exactly one CV shall be selected for each application.

CV-08 The selected CV shall not be changed after application submission.

CV-09 The system shall preserve a snapshot of the CV used in an application, even if the original CV is later edited or deleted.

CV-10 Super Admin and authorized Admins may manage available CV templates.

7. Employer Verification

VER-01 Employer verification shall require Business Name, Certificate of Incorporation/Registration, TIN, Business Licence and Representative details.

VER-02 Verification submissions shall enter Pending Review.

VER-03 Authorized Admins shall be able to review submitted verification information and documents.

VER-04 Authorized Admins shall be able to approve or reject verification.

VER-05 A rejected Employer may correct and resubmit the verification information.

VER-06 Verification history, including previous submissions and decisions, shall be retained.

VER-07 Approval or rejection date and time shall be recorded.

VER-08 An approved Employer shall immediately receive Employer functionality.

VER-09 An approved Employer shall be able to create and publish vacancies without additional Admin approval.

VER-10 Critical verified company information shall be protected from changes after approval.

VER-11 A company shall be allowed only one Employer account.

8. Vacancy Management

Mandatory vacancy information shall include: Job Title, Job Description, Job Requirements, Qualifications, Skills, Work Experience, Location, Employment Type, Number of Positions and Application Deadline. Salary and Job Category are optional.

VAC-01 Approved Employers shall be able to create vacancy drafts and publish vacancies.

VAC-02 Draft vacancies shall expire after 14 days if they remain unpublished.

VAC-03 Employers shall be able to edit permitted information in published vacancies.

VAC-04 Once applications exist, critical fields shall be protected from changes that could affect submitted applications.

VAC-05 Employers shall be able to delete their own vacancies and manually close published vacancies.

VAC-06 The system shall automatically close a vacancy when its application deadline is reached.

VAC-07 Applications already submitted shall remain accessible after a vacancy is closed.

VAC-08 New applications shall only be accepted while the vacancy is active.

VAC-09 The application deadline shall not be in the past, and the number of positions shall be greater than zero.

VAC-10 A manually closed vacancy may be reopened only through an Employer request reviewed and approved by an authorized Admin.

VAC-11 When an Employer is suspended, its active vacancies shall not accept new applications.

9. Job Search and Discovery

- Search by job title, location and job category.
- Filter and sort vacancy results.
- Save/bookmark vacancies and view saved vacancies.
- View active vacancies and access My Applications.
- View current application status.
- Use rule-based relevance matching; AI matching is not included in the initial release.

10. Application Management

APP-01 Only Job Seekers with profile completion of at least 75% shall be allowed to apply.

APP-02 Applications shall only be submitted to active vacancies.

APP-03 Exactly one CV shall be selected for each application.

APP-04 A cover letter shall not be required for an application.

APP-05 A Job Seeker shall not submit another active application for the same vacancy.

APP-06 A Job Seeker may reapply after a previous rejection if the vacancy remains active.

APP-07 An application may be edited before the deadline while its status is Submitted.

APP-08 Once an application moves to In Review, the Job Seeker shall no longer edit it.

APP-09 Applications cannot be edited after the deadline and cannot be withdrawn after submission.

APP-10 The Employer shall manage the application status.

APP-11 Application status shall follow: Submitted → In Review → Rejected OR Shortlisted for Interview.

APP-12 Each status change shall record date and time and shall remain in an immutable status history.

APP-13 The submitted application shall preserve the information and CV snapshot used at submission.

APP-14 Interviews and employer-candidate communication shall take place outside Halokazi.

11. Notifications

- Application submitted.
- Application moved to In Review.
- Application rejected.
- Job Seeker shortlisted for interview.
- New relevant vacancies based on the user's profile and preferences.
- SMS OTP for phone verification.

The MVP shall use in-system notifications for normal system events. Notification history shall be retained and shall support read/unread status.

12. Administration, Reporting and Moderation

12.1 Administration

- Only Super Admin can create Admin accounts.
- Only Super Admin can assign or revoke Admin permissions.
- Super Admin can suspend or deactivate Admin accounts.
- Admin access is restricted to assigned permissions.
- Important administrative actions shall be recorded in the audit log.

12.2 User Reporting and Moderation

- Job Seekers can report Employers, vacancies, inappropriate content, spam or abusive activity.
- Employers can report inappropriate or abusive Job Seeker activity.
- Reports shall record the reporter, reported entity, reason/category and date/time.
- Authorized Admins shall investigate and resolve or reject reports.

12.3 Reports and Analytics

- System-wide reports shall be available to Super Admin.
- Reports shall include Job Seekers, Employers, verification, vacancies and applications.
- Reports shall support date-range filtering and Excel/PDF export.
- Employers shall view analytics for their own vacancies and applications.
- Job Seekers shall view their own application statistics.
- The initial release shall use numbers and tables; charts are not required.

13. Audit Logging

- Important activities by all users shall be recorded.
- Audit entries shall identify the user, action, affected resource, date/time and result/status where applicable.
- Application status history shall be immutable.
- Timestamps shall use East Africa Time (UTC+3).
- Super Admin and Admins with the Audit Log permission shall be able to view audit logs.

14. Data Protection and Security

14.1 Data Protection

- Obtain explicit consent for personal-data processing.
- Require acceptance of Terms and Conditions and Privacy Policy.
- Record accepted policy versions.
- Allow users to access and correct their personal information.
- Support deletion requests subject to applicable retention requirements.
- Use soft deletion and appropriate anonymization where accounts are deleted.
- Apply applicable Tanzania data-protection and data-storage requirements, subject to Legal/DPO confirmation.
- Provide for a designated Data Protection Officer where required.

14.2 Security

- Validate uploaded file types and enforce file-size limits.
- Scan uploaded files for malware/viruses.
- Keep document storage appropriately isolated from the application server.
- Store passwords using secure one-way hashing.
- Use HTTPS/TLS for client-server communication.
- Protect sensitive information at rest.
- Check authentication, role, permission and authorization before protected operations.
- Validate and safely handle user input.
- Protect against SQL Injection and other injection attacks.
- Protect against Cross-Site Scripting (XSS).
- Securely manage authenticated sessions.
- Apply rate limiting to authentication, OTP, password reset and other abuse-prone endpoints.

15. Non-Functional Requirements

Area	**Requirement**
Availability	Target 99% monthly availability, excluding approved scheduled maintenance.
Performance	At least 95% of normal requests should respond within 2 seconds under normal expected load.

Responsive Design	System shall work on desktop, tablet and mobile browsers.
Scalability	System shall support growth in users, vacancies, applications and documents.
Backup	Automated backups shall run at least every 24 hours.
Recovery	RPO shall be 24 hours or better; RTO shall be 4 hours or better for a major system failure.
Monitoring	Monitor availability, errors, database health, storage, failed requests and infrastructure health.
Maintainability	System shall be maintainable and extensible.
Languages	System shall support English and Swahili.

16. Recovery Targets: RPO and RTO

For the initial release, the following targets are recommended and included in the requirements baseline:

Target	**Definition**	**Halokazi Requirement**
RPO	Maximum acceptable amount of data that may be lost after a major failure.	24 hours or better. Backups shall therefore be available at least daily.
RTO	Maximum acceptable time for restoring the system after a major failure.	4 hours or better.

These targets are practical for an initial in-house release and should be validated against Halotel infrastructure, backup capability and operational support before production deployment.

17. Core Business Rules

- Profile completion must be at least 75% before applying.
- Applications after vacancy closure or deadline are rejected.
- Reapplication is allowed after a previous rejection if the vacancy remains active.

- An application's CV snapshot remains available even if the original CV is deleted.
- Profile changes after submission do not modify the submitted application.
- Vacancy deadline cannot be in the past.
- Vacancy positions must be greater than zero.
- Draft vacancies expire after 14 days.
- Manually closed vacancies require Admin-approved reopening.
- Suspended Employers' active vacancies cannot receive new applications.
- Deleted Employer data is anonymized while required records are preserved.
- Notification history is retained.
- Relevant-job matching is rule-based.
- Users can report fraudulent, inappropriate or abusive activity.
- Authorized Admins can investigate and resolve reports.
- No application rate limit is required for the MVP; security-sensitive endpoints remain rate-limited.
- Only Super Admin can create Admin accounts and assign/revoke Admin permissions.
- Pending and rejected Employers have no Employer functionality.
- Approved Employers can publish vacancies without additional Admin approval.
- Submitted applications cannot be withdrawn.
- Selected application CV cannot be changed after submission.
- Applications become non-editable when status reaches In Review.
- Application status follows Submitted → In Review → Rejected or Shortlisted for Interview.
- Interviews and employer-candidate communication occur outside Halokazi.

18. Key Workflows

18.1 Job Seeker

Register → SMS OTP verification → Login → Complete Profile → Create CV → Search Vacancy → View Vacancy → Select CV → Complete Cover Letter → Submit Application → Employer Review → In Review → Rejected or Shortlisted for Interview.

18.2 Employer

Register Employer Account → Submit Verification → Pending Review → Admin Review → Approved or Rejected. Approved → Employer functionality enabled → Create Vacancy → Draft or Publish → Receive Applications → Review Applications → Update Status.

18.3 Vacancy

Draft → Published/Active → Closed. Reopening: Employer Request → Authorized Admin Review → Approved → Published/Active.

18.4 Administration

Super Admin creates Admin → Assigns permissions → Admin logs in → System checks permissions → Admin performs authorized action → Action is recorded in Audit Log.

19. Requirements Review and Approval

The Requirements Gathering and Analysis stage is considered complete once the project team confirms that the requirements in this document are correct, complete and feasible. Minor implementation details may be refined during SRS and design without changing the approved business requirements.

Role	Name	Signature	Date
Project/Product Owner			
Requirements/Business Analyst			
Technical Lead			
Developer Representative			
QA/Test Representative			
Project Manager			

20. Next Phase

- Detailed SRS
- Use case specifications and end-to-end workflows
- Requirements Traceability Matrix
- Data dictionary
- Database/ERD design
- System architecture

- API and integration specifications
- UI/UX requirements
- Acceptance criteria and testable requirements

END OF REQUIREMENTS GATHERING AND ANALYSIS
